

Torre del Tiro

This is another tower that has not been rebuilt. Nowadays, it is a large solid cube, mostly made out of rammed earth. There was a stretch of wall that originated at this tower and dropped down to the wall that surrounded the city. The remains of another tower, which formed a part of this wall, was discovered a few years ago, located almost at the level of the upper part of the Roman Theatre, which confirmed the layout that appeared in the historical plans.
